

Readme

Hello, I'm Rohit Jindal, currently serving as a Senior Data Scientist at Target. My journey in the data science realm has taken me through some remarkable organizations, including Mastercard, State Street, and Indian Railways. My academic path has been equally enriching, with stops at the Indian Institute of Science (IISc), the University of Cambridge, and Delhi Technological University (DTU).

Welcome Note

Dear learners, welcome to our shared journey of discovery and growth. I've put together a comprehensive set of resources aimed at streamlining your learning process. After each class, I take the time to compile our discussions into accessible formats, ensuring you have everything you need to solidify your understanding and prepare for what lies ahead.

Here's what I've prepared for you:

- **Scribble Notes:** These are the immediate, raw notes from our live sessions, capturing the dynamic flow of our discussions.
- **Micronotes:** I distill the essence of each class into a 5-minute summary, breaking down complex ideas into simple, digestible pieces.
- **Interview Questions:** Drawing from my experience, I've compiled a set of questions to challenge your understanding and prepare you for real-world applications. These are not tied to specific classes but are organized to build upon each other logically.

I've organized these materials into three folders, which will be automatically updated after every class to ensure you have the most current information at your fingertips.

Resource Folders

1. **Scribble Notes:** This folder is a direct reflection of our classroom interactions, offering you the raw, unedited insights from each session.
2. **5 Minute Summary:** Here, you'll find concise summaries of our classes, designed to help you quickly recall and review the key concepts we've covered.
3. **Interview Questions:** This collection is your toolkit for deepening your understanding and testing your knowledge against practical, real-world problems. Please follow the sequence provided for the best learning experience.

I'm excited to be part of your learning journey and am here to support you every step of the way. Let's embark on this path of knowledge and growth together. Happy learning!
